CANCER
LETTERS

Subject index
Volume 77 (1994)

Adenofibroma, neuropeptides, breast, cancer, stroma, human, 51
Amylase, placental alkaline phosphatase, lactate dehydrogenase, 5′ nucleotidase, ovarian cancer, multivariate analysis, 39
Analytical cytology, image analysis, contextual analysis, syntactic structure analysis, cervical neoplasm, 139
Anticarcinogenic effect, Rooibos tea, *Aspalathus linealis*, C3H10T1/2 cell transformation, antioxidant, radiation-induced transformation, 33
Antioxidant, Rooibos tea, *Aspalathus linealis*, anticarcinogenic effect, C3H10T1/2 cell transformation, radiation-induced transformation, 33
Artificial intelligence, neural networks, prognostic factors, censored data, Cox regression, 127
Artificial neural networks, cancer detection, image processing, pattern recognition, 79
Aspalathus linealis, Rooibos tea, anticarcinogenic effect, C3H10T1/2 cell transformation, antioxidant, radiation-induced transformation, 33
ATP, ovary, cell line, calcium, histamine, 57
Automated cytology, cervical cytology, Pap smear, neural networks, PAPNET, screening, 155

Backpropagation, ultrasonography, radiology, neural network, hepatic masses, hepatic cancer, metastatic carcinoma, hepatoma, cavernous hemangioma, 95
Backpropagation neural networks, computer-assisted image analysis, discriminant analysis, 111
Bladder tumor, glutathione, glutathione transferase, detoxification, 15
Breast, neuropeptides, cancer, adenofibroma, stroma, human, 51
Breast biopsy, mammography, digital radiography, computer-aided diagnosis, 201
Breast cancer, digital morphometry, image analysis, machine learning, fine needle aspiration, 163
Breast cancer, insulin-like growth factor binding proteins, estrogen receptor, progesterone receptor, S-phase fraction, 25
Breast cancer, neural networks, ovarian cancer, CA 15-3, CA 125, 145

C3H10T1/2 cell transformation, Rooibos tea, *Aspalathus linealis*, anticarcinogenic effect, antioxidant, radiation-induced transformation, 33
CA 125, neural networks, breast cancer, ovarian cancer, CA 15-3, 145 CA 15-3, neural networks, breast cancer, ovarian cancer, CA 125, 145
Calcium, ovary, cell line, ATP, histamine, 57
Cancer, neuropeptides, breast, adenofibroma, stroma, human, 51
Cancer database linkage, high performance computing in cancer, image transmission and analysis, computer-aided diagnosis, cancer patient management, 69
Cancer detection, artificial neural networks, image processing, pattern recognition, 79
Cancer patient management, high performance computing in cancer, cancer database linkage, image transmission and analysis, computer-aided diagnosis, 69
Cavernous hemangioma, ultrasonography, radiology, backpropagation, neural network, hepatic masses, hepatic cancer, metastatic carcinoma, hepatoma, 95
Cell line, ovary, calcium, ATP, histamine, 57
Censored data, neural networks, artificial intelligence, prognostic factors, Cox regression, 127
Cervical cytology, automated cytology, Pap smear, neural networks, PAPNET, screening, 155
Cervical neoplasm, image analysis, contextual analysis, syntactic structure analysis, analytical cytology, 139
Chaos, neural networks, non-linear statistics, myocardial infarction, 85
Chronic atrophic gastritis, gastric mucosa, ^{32}P-postlabelling, gastric cancer, 45 Colitis, colorectal cancer, NCA, monoclonal antibodies, 7
Colorectal cancer, colitis, NCA, monoclonal antibodies, 7
Computational statistics, computer assisted diagnosis, Wolfe patterns, feature extraction, pattern recognition, fractals, probability density function, 183
Computer assisted diagnosis, computational statistics, Wolfe patterns, feature extraction, pattern recognition, fractals, probability density function, 183
Computer-aided diagnosis, high performance computing in cancer, cancer database linkage, image transmission and analysis, cancer patient management, 69

SSDI 0304-3835(94)03338-J

Computer-aided diagnosis, mammography, digital radiography, breast biopsy, 201
Computer-assisted image analysis, backpropagation neural networks, discriminant analysis, 111
Computer-assisted radiology, lung cancer staging, image processing, data fusion, 191
Contextual analysis, image analysis, syntactic structure analysis, analytical cytology, cervical neoplasm, 139
Cox regression, neural networks, artificial intelligence, prognostic factors, censored data, 127

Data fusion, computer-assisted radiology, lung cancer staging, image processing, 191
Detoxification, glutathione, glutathione transferase, bladder tumor, 15
Digital morphometry, breast cancer, image analysis, machine learning, fine needle aspiration, 163
Digital radiography, mammography, computer-aided diagnosis, breast biopsy, 201
Discriminant analysis, computer-assisted image analysis, backpropagation neural networks, 111

Early detection, image analysis, preneoplasia, software, image processing, 103
Edge detectors, mammography, microcalcification detection, non-linear filtering, wavelets, 173
Estrogen receptor, breast cancer, insulin-like growth factor binding proteins, progesterone receptor, S-phase fraction, 25
Ethyl carbamate (urethan), 2-hydroxyethylcarbamate, vinyl carbamate, lung adenomas, 1

Feature extraction, computational statistics, computer assisted diagnosis, Wolfe patterns, pattern recognition, fractals, probability density function, 183
Fine needle aspiration, breast cancer, digital morphometry, image analysis, machine learning, 163
Fractals, computational statistics, computer assisted diagnosis, Wolfe patterns, feature extraction, pattern recognition, probability density function, 183

Gastric cancer, gastric mucosa, chronic atrophic gastritis, ^{32}P-postlabelling, 45
Gastric mucosa, chronic atrophic gastritis, ^{32}P-postlabelling, gastric cancer, 45
Glutathione, glutathione transferase, detoxification, bladder tumor, 15
Glutathione transferase, glutathione, detoxification, bladder tumor, 15

Hepatic cancer, ultrasonography, radiology, backpropagation, neural network, hepatic masses, metastatic carcinoma, hepatoma, cavernous hemangioma, 95
Hepatic masses, ultrasonography, radiology, backpropagation, neural network, hepatic cancer, metastatic carcinoma, hepatoma, cavernous hemangioma, 95 Hepatoma, ultrasonography, radiology, backpropagation, neural network, hepatic masses, hepatic cancer, metastatic carcinoma, cavernous hemangioma, 95
High performance computing in cancer, cancer database linkage, image transmission and analysis, computer-aided diagnosis, cancer patient management, 69 Histamine, ovary, cell line, calcium, ATP, 57
Human, neuropeptides, breast, cancer, adenofibroma, stroma, 51
2-Hydroxyethylcarbamate, ethyl carbamate (urethan), vinyl carbamate, lung adenomas, 1

Image analysis, breast cancer, digital morphometry, machine learning, fine needle aspiration, 163
Image analysis, contextual analysis, syntactic structure analysis, analytical cytology, cervical neoplasm, 139
Image analysis, preneoplasia, software, image processing, early detection, 103
Image processing, artificial neural networks, cancer detection, pattern recognition, 79
Image processing, computer-assisted radiology, lung cancer staging, data fusion, 191
Image processing, image analysis, preneoplasia, software, early detection, 103
Image processing, lung nodule, neural networks, 119
Image transmission and analysis, high performance computing in cancer, cancer database linkage, computer-aided diagnosis, cancer patient management, 69
Insulin-like growth factor binding proteins, breast cancer, estrogen receptor, progesterone receptor, S-phase fraction, 25

Lactate dehydrogenase, placental alkaline phosphatase, 5′ nucleotidase, amylase, ovarian cancer, multivariate analysis, 39
Lung adenomas, 2-hydroxyethylcarbamate, ethyl carbamate (urethan), vinyl carbamate, 1
Lung cancer staging, computer-assisted radiology, image processing, data fusion, 191
Lung nodule, neural networks, image processing, 119

Machine learning, breast cancer, digital morphometry, image analysis, fine needle aspiration, 163
Mammography, digital radiography, computer-aided diagnosis, breast biopsy, 201
Mammography, microcalcification detection, non-linear filtering, wavelets, edge detectors, 173
Metastatic carcinoma, ultrasonography, radiology, backpropagation, neural network, hepatic masses, hepatic cancer, hepatoma, cavernous hemangioma, 95
Microcalcification detection, mammography, non-linear filtering, wavelets, edge detectors, 173
Monoclonal antibodies, colorectal cancer, colitis, NCA, 7
Multivariate analysis, placental alkaline phosphatase, lactate dehydrogenase, 5′ nucleotidase, amylase, ovarian cancer, 39
Myocardial infarction, chaos, neural networks, non-linear statistics, 85

NCA, colorectal cancer, colitis, monoclonal antibodies, 7
Neural network, ultrasonography, radiology, backpropagation, hepatic masses, hepatic cancer, metastatic carcinoma, hepatoma, cavernous hemangioma, 95
Neural networks, artificial intelligence, prognostic factors, censored data, Cox regression, 127
Neural networks, automated cytology, cervical cytology, Pap smear, PAPNET, screening, 155
Neural networks, breast cancer, ovarian cancer, CA 15-3, CA 125, 145
Neural networks, chaos, non-linear statistics, myocardial infarction, 85
Neural networks, lung nodule, image processing, 119
Neuropeptides, breast, cancer, adenofibroma, stroma, human, 51
Non-linear filtering, mammography, microcalcification detection, wavelets, edge detectors, 173
Non-linear statistics, chaos, neural networks, myocardial infarction, 85 5′
Nucleotidase, placental alkaline phosphatase, lactate dehydrogenase, amylase, ovarian cancer, multivariate analysis, 39

Ovarian cancer, neural networks, breast cancer, CA 15-3, CA 125, 145
Ovarian cancer, placental alkaline phosphatase, lactate dehydrogenase, 5′ nucleotidase, amylase, multivariate analysis, 39
Ovary, cell line, calcium, ATP, histamine, 57

^{32}P-postlabelling, gastric mucosa, chronic atrophic gastritis, gastric cancer, 45
Pap smear, automated cytology, cervical cytology, neural networks, PAPNET, screening, 155
PAPNET, automated cytology, cervical cytology, Pap smear, neural networks, screening, 155
Pattern recognition, artificial neural networks, cancer detection, image processing, 79
Pattern recognition, computational statistics, computer assisted diagnosis, Wolfe patterns, feature extraction, fractals, probability density function, 183
Placental alkaline phosphatase, lactate dehydrogenase, 5′ nucleotidase, amylase, ovarian cancer, multivariate analysis, 39
Preneoplasia, image analysis, software, image processing, early detection, 103 Probability density function, computational statistics, computer assisted diagnosis, Wolfe patterns, feature extraction, pattern recognition, fractals, 183
Progesterone receptor, breast cancer, insulin-like growth factor binding proteins, estrogen receptor, S-phase fraction, 25
Prognostic factors, neural networks, artificial intelligence, censored data, Cox regression, 127

Radiation-induced transformation, Rooibos tea, *Aspalathus linealis*, anticarcinogenic effect, C3H10T1/2 cell transformation, antioxidant, 33
Radiology, ultrasonography, backpropagation, neural network, hepatic masses, hepatic cancer, metastatic carcinoma, hepatoma, cavernous hemangioma, 95
Rooibos tea, *Aspalathus linealis*, anticarcinogenic effect, C3H10T1/2 cell transformation, antioxidant, radiation-induced transformation, 33

S-phase fraction, breast cancer, insulin-like growth factor binding proteins, estrogen receptor, progesterone receptor, 25
Screening, automated cytology, cervical cytology, Pap smear, neural networks, PAPNET, 155
Software, image analysis, preneoplasia, image processing, early detection, 103
Stroma, neuropeptides, breast, cancer, adenofibroma, human, 51
Syntactic structure analysis, image analysis, contextual analysis, analytical cytology, cervical neoplasm, 139

Ultrasonography, radiology, backpropagation, neural network, hepatic masses, hepatic cancer, metastatic carcinoma, hepatoma, cavernous hemangioma, 95

Vinyl carbamate, 2-hydroxyethylcarbamate, ethyl carbamate (urethan), lung adenomas, 1

Wavelets, mammography, microcalcification detection, non-linear filtering, edge detectors, 173
Wolfe patterns, computational statistics, computer assisted diagnosis, feature extraction, pattern recognition, fractals, probability density function, 183
